

# Oregon

Oregon is new to the list of top 10 states for afterschool, moving up from a “state on the move” in 2009. Oregon’s seventh place rank is due to strong overall parent satisfaction with their child’s afterschool program, as well as with specific aspects of the program, including the program’s quality of care, variety of activities and cost. However, the percentage of Oregon children who are alone and unsupervised after school is above the national average, and there remain more than 4 in 10 Oregon children not in an afterschool program who would be enrolled if a program were available to them.
