

South Dakota

In 2009, South Dakota experienced a dip in afterschool program participation, from 16 percent in 2004 to 12 percent in 2009. This year, afterschool program participation grew slightly, to 14 percent, but remains well below the national average. Similarly, although the percentage of children alone and unsupervised decreased in 2014—from 37 percent in 2009 to 27 percent in 2014—it is 7 percentage points above the national average. Although below the national average, unmet demand for afterschool programs in South Dakota is high. Nearly 1 in 3 children not in an afterschool program would be enrolled if one were available to them.
