

New Mexico

New Mexico's afterschool program participation rate has fluctuated throughout the past 10 years, decreasing from 19 percent in 2004 to 17 percent in 2009 and back up to 21 percent in 2014. While the percentage of children participating in an afterschool program has increased, the average amount of time spent in a program per week has decreased—dropping from 9 hours in 2009 to fewer than 7 in 2014—playing a role in New Mexico's fall out of the top 10 states for afterschool. Satisfaction with afterschool programs overall has remained high in New Mexico; currently 92 percent of parents report that they are satisfied with their child's afterschool program.
