

Arkansas

Arkansas has seen a steady increase in the percentage of children participating in an afterschool program—growing from 8 percent in 2004 to 12 percent in 2009 to 13 percent in 2014. However, Arkansas’ afterschool participation rate still falls well below the national average of 18 percent. The average time Arkansas children spend in an afterschool program also falls below the national average in 2014, decreasing from approximately 7 hours per week to just more than 6 hours. Additionally, unmet demand for afterschool programs in Arkansas continues to increase. In 2004, 33 percent of children not enrolled in an afterschool program would participate if a program were available in their community. In 2014, 45 percent of Arkansas children not in an afterschool program would be enrolled if one were available.
