

California

California has secured the number one spot in the top 10 states for afterschool, moving up from fourth in 2009. The state's afterschool program participation rate has surged over the past five years, increasing 6 percentage points from 2009 and serving more than 377,000 additional students across California. Despite California's high participation rates, high percentage of parents satisfied with their child's afterschool program overall, and strong support for public funding for afterschool programs, there is still significant unmet demand for afterschool programs in the state. Half of children not enrolled in an afterschool program would be enrolled in one if a program were available to them.
