

Hawaii

Hawaii rounds out the top 10 states for afterschool. Similar to 2009, a strong afterschool participation rate—26 percent—is a primary contributing factor to its top 10 status. While more than 9 in 10 parents support public funding for afterschool programs and Hawaii continues to be among the states with the highest afterschool participation rates, the percentage of children in an afterschool program has continued to decrease, dropping from 35 percent in 2004 to 28 percent in 2009 to 26 percent in 2014. Similarly, the average amount of time Hawaii's children spend per week in afterschool programs decreased in 2014 compared to 2004 and 2009, dropping from approximately 9 hours to 7.63 hours.
