

# ERICA Georgia

For the first time, Georgia's afterschool program participation rate falls below the national average, dropping back down to its 2004 level of 16 percent. Additionally, despite strong parent satisfaction with their child's afterschool program and parent support for public funding for afterschool programs, unmet demand for afterschool programs in Georgia continues to climb. The percentage of children not in an afterschool program who would be enrolled in a program if one were available increased from 26 percent in 2004 to 32 percent in 2009 to 40 percent in 2014.
